Summary

Analytics Lead with expertise in **statistical modeling, experimentation, and ads measurement within Retail Media Network**. Proven ability to apply scientific rigor to complex product and business problems, translating large-scale behavioral and performance data into actionable insights that **improve advertiser outcomes, product efficiency, and long-term marketplace health**. Experienced in **leading end-to-end analytics projects from problem definition and experimentation design to scalable data products and executive communication** while partnering closely with Product, Engineering, Marketing Science, Media and Business teams.

Relevant Experience

Analytics Lead

09/2024 – present

@Albertsons Media Collective | Pleasanton, CA

- **Led the development of advanced marketplace and advertiser metrics** across teams, including Customer Lifetime Value, Buyer Analysis, and Incrementality, enabling improved measurement of long-term customer impact and **driving 30-40% average ROAS lift** and sustained **new customer growth**.
- **Owned full-cycle measurement and experimentation** through closed-loop attribution partnerships (Pinterest, Meta, Perion, NBCUniversal/CTV, LiveRamp), **improving data quality, reducing reporting latency, and enabling consistent cross-channel performance measurement**.
- **Designed and evaluated experiments** for **propensity models (1st Party)** and **lookalike audiences (3rd Party)**, including hypothesis definition, test/control design, success metrics, and iteration plans, **directly informed pricing, targeting, and product roadmap decisions**.
- Built **scalable measurement infrastructure and automated Power BI dashboards** by integrating complex and multi-source datasets, **providing clear visibility into campaign performance, attribution outcomes, and marketplace trends, contributing to ongoing performance reviews, strategic planning and actionable recommendations for senior leaders**.
- Partnered closely with **Product, Engineering, and Business teams** to define metric logic, validate pipelines, and ensure analytical solutions were production-ready and scalable.

Data Engineer

12/2023 – 08/2024

@Bookiea LLC | Cupertino, CA – [Bookiea.com](#) serves as a B2B and B2C educational platform that integrates extra-curriculum activities, simplifies the booking process for parents, and connects students, parents and educators.

- Designed and implemented **scalable data schemas and pipelines** aligned with product growth and business objectives, **supporting analytics, experimentation, reporting use cases, and product performance measurement**.
- Established **KPIs, data quality checks, and monitoring processes**, improving system reliability and analytical confidence for product and business stakeholders.
- Collaborated with Engineering to **optimize backend systems using Golang and AWS, reducing codebase size by 30% and improving execution speed by over 50%**.
- Conducted **funnel and behavioral analysis** using JavaScript and PostgreSQL to **identify user drop-offs and inform product optimization decisions**.
- **Built a fraud detection model** with real-time alerting, **reducing automated sign-ups and protecting platform integrity**.
- Contributed end-to-end analytics lifecycle including **ETL, EDA, feature engineering, predictive modeling, parameter tuning, validation and visualization, enabling scalable insights in a production data environment**.

Senior Associate – Business Analytics

04/2019 – 08/2023

@Dream Builder Financial | San Jose, CA – Servers as a financial marketplace for individuals/groups with services/products from financial providers.

- Applied **statistical analysis, regression/classification models and customer segmentation** to understand user behavior, inform marketing strategy, and improve acquisition and retention strategies.
- Built **interactive reporting dashboards** via Tableau to support leadership to monitor funnel performance, cohort behavior, and long-term trends, informing rebranding decisions across 80% of product offerings.
- Leveraged **data mining and predictive techniques** to personalize financial strategies based on customer risk profiles, goals, and behavioral patterns.

Education and Certificates

Master of Science in Engineering/Data Science @University of California, Riverside Riverside, CA	12/2023
Database and Data Analytics Certificate @University of California, Santa Cruz Extension Santa Clara, CA	06/2021
Programming in Python @De Anza College Cupertino, CA	06/2021
Bachelor of Science in Science Education/Physics @Guangxi Normal University Guilin, China	07/2013
